Re: Summer internship for international students

**Deadline:
4th December 2022**

Dear colleague,

Since 2008, the programme **Summer@EPFL** offers summer internships for international BSc and MSc students.

The goal of the internship programme is to allow top international students in **Computer Science and Engineering, Telecommunications, Electrical Engineering**, or related subjects to discover our campus and participate in our research activities. Complete information about this program can be found on our website:

<https://summer.epfl.ch/>

We would be most grateful if you could display the poster in your department and share the information with your students.

We thank you in advance for your cooperation.

Yours sincerely,

Prof. Paolo lenne

Director of the Summer@EPFL programme
